

Ready for the Trials Ahead™

Every clinical trial has trials of its own. Korio anticipates and tackles these challenges with precision, speed, and dependability.

Built on decades of expertise, Korio offers more than just the most adaptable and intuitive Randomization & Trial Supply Management (RTSM) solution available—we are expert partners who instill confidence at every stage of your trial.

With Korio, you'll always be Ready for The Trials Ahead.™

Ready for Customization

Adapt to any trial need across all study phases. Korio's vast experience and advanced platform capabilities ensure tailored, seamless trial execution for even the most complex trials, including precision medicine.

Ready for Change

Implement mid-study changes with unwavering speed and consistency—with a uniquely modern approach to software design that makes time-consuming, error-prone change requests a thing of the past.

Ready for Your Next Trial

Streamline your trial portfolio with reusable features and settings, enabling efficient, consistent, and synchronized updates across studies.

Randomization & Dose Assignment

Trust Korio's experts to set up even the most complex trial designs for participant randomization and dose assignment. Through continuous system monitoring and reporting we ensure the integrity of your study data from start-up to closeout.

Study Management

Review and update your study's console reporting and configurable settings to adapt your RTSM to trial workflow changes as they occur in real-time.

Participant Management

Align trial design, visit schedules, and site supply needs to ensure adequate inventory for all dispensing visits. Korio's intuitive interface guides site staff through the participant's journey, from initial screening to trial completion.

Site Management

Add, edit, activate, deactivate, and manage critical site-level settings such as enrollment caps and supply parameters for your sites through the Korio portal.

Clinical Supply Management

Manage all aspects of your clinical supply chain from QP release to treatment assignment through final IP accountability and destruction.

Reporting and Forecasting

Configure and export real-time reports for insights on supplies, shipments, and kits across depots and sites, providing essential data for forecasting.

Expiry Management

Proactively manage expiry dates, country designations, and batch settings to minimize waste and ensure supply integrity.

Shipments and Kits

Effortlessly initiate, track, and manage shipments and kits, including robust temperature excursion monitoring for sensitive materials.

Accountability

Enable accurate and timely accountability of supplies from batch release to destruction, ensuring transparency and compliance.

Drug Release and Country Approval

Streamline your QP release process within the Korio platform, ensuring compliance across different regions.

Real-Time Audit Trail

A user-friendly, blind-controlled audit trail ensures transparency and access to critical data. Validated self-service options enable quick data changes.

Active Trial Rescue

RTSM underperforming? Korio seamlessly migrates your RTSM data without compromising participant care, disrupting operations, or wasting existing supplies.

Move on to the Next Phase of RTSM with Korio

Quality, Speed, and Reliability

Korio offers rapid adaptability without the complexities and delays of traditional RTSM systems. Quick configuration changes maintain quality, while automated testing and real-time monitoring ensure reliability and keep trials on track.

Compliance & Control

Keep your trials FDA/MHRA compliant with Korio's continuous audit trail access. Portfolio-wide reporting provides comprehensive oversight, enabling informed decisions and precise control over your clinical supplies.

Customer Satisfaction & Confidence

Korio simplifies RTSM with an intuitive interface guiding your next steps. Access seamless support through our integrated help center and dedicated expert project management. Navigate your trials confidently with readily available RTSM expertise.
